A survey of Remington Rand safes located in the Directorate of Administration was completed in September. During the survey you were advised which safes needed to be replaced with new or reconditioned safes. Please advise this office of the status of your proceedings re corrective measures. Thanks.

Have informed personnel in 3E-24 of problem safes. The appropriate forms will be submitted to replace safe #1355. The remaining safes will be repaired by the Headquarters Engineering Branch personnel. If you require further information please call Thanks.
